

**Client:**

**Housing Developer**

### **The Project**

Housebuilder wanted to test the thermal performance of their newly constructed dwelling to prove the efficacy of their closed panel system.

### **The Measurements**

Designed thermal performance: **168.88 W/K**

Measured thermal performance: **168.45 W/K**

Performance Gap: **0%**

### **The Outcomes:**

- Proved the thermal efficiency of their dwelling and product
- Provided quality assurance and valuable feedback
- Results were used for marketing
