Westgate have worked with Mace, known as global experts in shaping the built environment, on numerous occasions and with an excellent track record we were consulted again for the construction project at 40 Leadenhall Street, London.

Mace needed a **quick install, 60-minute fire-rated solution** for the project. We provided and installed 230 linear metres of Hoardfast Firescreen, to form corridors leading to welfare facilities and crane protection, keeping workers safe and the site secure.

Available in a range of heights, **Hoardfast Firescreen panels are 60-minute fire rated – Euro Class EN 13501-2:2008 A2 s1 d0 fire class rating and EI60 fire resistance.** Panels are 80mm thick, white, steel faced with a mineral wool filling.

We also installed standard Hoardfast uPVC panels to form toilet cubicles on numerous levels within the project site.
