BW are a fit out and refurbishment company and were working on a London fit out project in a six storey office development at 1 Finsbury Avenue. They required a **range of site rooms, welfare spaces and toilet blocks** for contractors working on site.

Hoardfast was the ideal solution due to its **professional appearance and ability to be easily assembled, demounted and relocated** to help meet project demands. Hoardfast was used to create a suite of facilities for contractors, including a changing area, office, meeting rooms, a contemplation and multi-faith room, and toilet cubicles. Using the Hoardfast product it's really easy to create private areas for prayer and reflection, that are safe, clean and quiet.

A **fast site setup and the ability to relocate the system without any waste being created**, were also two big factors on this project. So too was being able to create a **clean and professional looking site set up**.
